AMENDMENT DESCRIPTION:

The continued purpose of the PATRP contract is to provide technical assistance, capacity building and project transaction support services in the energy sector. PATRP was designed to support the Power Africa Presidential Initiative. However, soon after its award, the targets for the initiative tripled. To support the new goals of the initiative, Power Africa expanded the PATRP contract from US $64,226,714 to $148,758,549. Although the intended geographic focus of the program has not changed, the planned expansion from the initial six Power Africa countries (Kenya, Ethiopia, Tanzania, Nigeria, Ghana and Liberia) to the rest of sub-Saharan Africa, has been accelerated.

There is no change in the activities to be supported and/or the approach to be used by the program.

The only change for the amendment to the IEE is to increase the PATRP contract ceiling from US $64,226,714 to US $148,458,549.
